

Specification Sheet

Self Contained Panel with Remote Monitoring

The Proserv Microcontroller based actuator control panel is used for the valve actuation applications. With no external power supply required, the IOT panel provides status monitoring via the mobile application.

Applications:

- Pressure and burst tests
- Leak tests
- Valve actuating

Technical details - typical configuration

Model Number	CAC-RSC-5K
Dimensions	450(L) x 450 (H) x 450 (W)
Weight	~15 kg
Controller	Microcontroller with wi-fi
Display	LED display (Green) 4 lines
Operating Temperature	-40 °C + 120 °C
Supply Voltage	12 V DC battery powered (in-built)
GPIO Pins	16 nos
Programming Method	Embedded C
Software	Cloud server, Android IOS App
