Specialist equipment supply

We are a leading, specialist supplier of hazardous area and industrial electrical solutions. We can provide expert electrical advice, quality products and services tailored to meet your requirements.

Our dedicated team is on hand to offer specialist advice and supply a range of equipment for use in hazardous (Ex) and non-hazardous areas, including:

- Audible and visual alarms
- Cable glands
- Cable management products
- Control stations
- Distribution boards
- Earth and lighting protection material
- Electrical and instrumentation cables
- Fixed and temporary LED lighting
- Heating and ventilation
- Isolators
- Junction boxes
- Plugs and sockets
- Termination kits and accessories

Proserv has extensive experience working with some of the highest quality electrical manufacturers in the industry. From planning, product application and selection advice, through to sourcing, purchasing and expediting, you can draw on our expertise and established industry partnerships to satisfy your material requirements.

Ex equipment maintenance

Our expertise goes beyond equipment supply. We deliver hazardous area Ex inspection and maintenance services, ensuring compliance with international standards for equipment used in potentially explosive atmospheres.

- Implementation of Ex strategies to comply with client's maintenance plans
- Preparation, maintenance, and management of our client's Ex equipment register
- Ex equipment surveys
- Visual, close, and detailed inspections of Ex equipment
- RFID tagging with data managed using the latest software packages
- Defect rectification
- Installation of small design scopes and modifications
- Weidmuller on-site junction box modifications

Junction box assembly

Our services include the design, assembly and supply of Ex certified junction boxes that allow us to provide customised solutions whilst reacting quickly to our client's demand.

Our trained team has extensive experience in the assembly of Ex enclosures. We can provide a fully customised product with a focus on exceeding our customers' expectations by providing the highest levels of quality, expertise, and service.

Proserv is the sole third-party assembler of Weidmuller (Klippon) junction boxes in the UAE. From our Abu Dhabi service centre, we hold an extensive inventory of Weidmuller GRP and Stainless Steel enclosures. Enclosures can be modified and certified on site to meet each client's specification and requirements.

Serious about service

When a customer buys a product or service from Proserv, they buy a lifetime of support and expertise. We also seek to continually improve the service we provide and try to exceed expectations. Our customers recognise us for service excellence and commitment to quality.

We focus on supplying competent technical personnel to carry out solutions from concept to completion in the design, supply, installation, maintenance, and inspection of electrical and instrumentation equipment installations.

Our certified engineers and technicians are experienced in providing a comprehensive range of hazardous area Ex inspection and maintenance services across a wide range of industries.

Core to the Proserv offering is our ability to manufacture, deliver and support solutions locally, by local and highly experienced technicians. For us, local content is not just about meeting legislative requirements or ticking a box. We do it because we have a responsibility. It creates a positive social and economic impact and makes good business sense. To ensure this is sustained, we recognise the need to support, train and build local expertise, which we do through our skills development programmes.
