

Topside Controls

Systems and Services

proserv

The background of the image is a close-up, slightly blurred photograph of industrial control equipment. It features a complex arrangement of metal frames, pipes, and electrical components. Numerous black and orange cables are bundled together and connected to various terminals and sensors. Some components are labeled with white tags, including "SSSV (GLASS)", "HYD. RETUR", "SUPPLY FROM", "TO SSSV", and "ISO". The overall color palette is dominated by metallic greys, oranges, and blacks, with a semi-transparent dark grey overlay on the right side where the text is placed.

Proserv improves the reliability, integrity and productivity of critical infrastructure with industry leading controls. We design, manufacture, install and service the full range of production control equipment right across the energy value chain.

Wellhead Control Systems

Proserv's pneumatic, hydraulic or electronic logic systems are custom engineered to increase the safety on oil and gas production wells by controlling the critical process and safety parameters. They are suitable for remote areas and hostile environments; onshore and offshore.

Sampling Systems

Proserv specialises in the provision of sampling equipment, systems and custom solutions throughout the life of the reservoir from evaluation and appraisal through to decommissioning.

Chemical Injection Systems

Proserv provides custom-built injection systems for a broad range of process applications. Our mobile, permanent or compact chemical injection systems reduce the formation of scale, foaming and corrosion to enhance production and protect assets.

Emergency Shutdown Systems

Proserv manufactures and supplies various types of emergency shutdown systems designed for well completions / well testing applications. As a company standard, our systems are fully manufactured from SS316 stainless steel for use in harsh working environments.

Hydraulic Power Units

Proserv's extensive range of hydraulic power units are designed to provide a safe and reliable hydraulic supply to a wide range of end-user equipment, operating in hazardous environments.

Smart Box Well Monitoring

Proserv's Smart Box enables operators to monitor remote wells in real time, efficiently and economically, which avoids up to 1% production losses. The package is custom made to monitor vital process parameters through instant detection with real time shutdown alerts.

As a global original equipment manufacturer with a well established track record of installed systems, we use our local content staffed service centres to inspect, maintain, repair or replace active production equipment in the field.

We carry out large complex orders, operate LEAN processes, continuous improvement and introduce new technological solutions.

Our brand heritage

At Proserv, we are proud of our history. Our portfolio of brands each have a strong track record of proven project delivery.

By bringing these businesses together under one cohesive organisation, we were able to enhance our market presence and extend our global reach and support coverage. We have the knowledge and experience to support and maintain the brands below.

Automation USA

AUTOCON LTD.

Over 50 years' experience providing engineering, manufacturing and service

Field development

Commissioning / installation
Flushing, testing and calibration
Shutdown support / on-site services

20,000+

Production control systems manufactured

Life of Field (AEGIS)

Inspection, repair and maintenance
Production optimisation
Pipeline services

5,000+

Wellhead control systems supplied

Services and aftermarket

Equipment rental
Training programmes
Spare parts sales
Partner alliance programme
Consignment stocking
Equipment enhancement
Rehabilitation and recertification
Equipment overhaul

1,750

Sampling systems and cylinders supplied

1,000

Production control system refurbishments

1,000

Chemical injection systems supplied

We improve the reliability, integrity, efficiency and productivity of critical infrastructure with industry leading controls technology.

CONTROL | MONITORING | INTELLIGENCE | OPTIMISATION
