

Our subsea controls GO FURTHER

As we believe our innovative technology is the most reliable on the market, our subsea control systems are now backed by a seven-year warranty.*

Proserv's pledge

Our disruptive subsea control systems support long-term production, ensure reliable operational performance and are designed to never become obsolete throughout the life of field.

When data shows that subsea control systems may fail after just 22 months**, we know Proserv's controls will go much further - safeguarded by warranty.
